

WHAT IS IT?

The Active Skin Repair products are a multifunctional non-toxic skin and wound repair solution that kill 99.9% of all bacteria while speeding the healing process.

WHAT DOES IT WORK ON?

Cuts, scrapes, rashes, insect bites, sunburns and other skin irritations.

HOW DOES IT WORK?

Active Skin Repair uses a proprietary, doctor-recommended and clinically proven formulation of HOCL, a medical-grade product used in hospitals worldwide. HOCL is a molecule produced by our bodies in response to injury that kills bacteria and supports the natural healing process.

WHAT DOES IT REPLACE?

Bulky toxic first aid products like antibiotic creams, peroxide, alcohol, anti-itch creams, after sun lotions and much more. Now you can get all of the benefits of these products in one non-toxic and non-sensitizing (no sting) product--and all in a simple-to-use, single 3 oz bottle.

HYDROGEL VS SPAY

Both Active Skin Repair products use the same active ingredient HOCL. The hydrogel uses a non-toxic biodegradable gel that helps moisturize damaged skin while the spray provides a liquid mist. The hydrogel and spray can be used together or separately based on preference.

IS IT SAFE?

Because HOCL is innate to your immune system, it is safe to use, even near your eyes, ears, and mouth.

WHAT IS THE SHELF LIFE?

Two years.

HOW DO I KNOW IT'S WORKING?

Simply apply and let the molecule go to work. All of our products go through a robust process testing for safety, efficacy, and stability before being released.

IS THERE EVIDENCE?

HOCL has been well studied, with evidence of efficacy published in hundreds of peer reviewed medical journals. Our products use the same medical-grade formulation used in hospitals.

ABOUT BLDG ACTIVE:

BLDG Active is building a bridge between science and sports by bringing cutting-edge, medical-grade technologies directly to athletes. Our company makes products that promote personal health and recovery through clinically proven technologies that are also kind to the planet.

As a 1% for The Planet Company, 1% of all sales (not profits) go back to non profit environmental organizations to help protect the playgrounds we all love.
